# O经营理念

OPERATION PHILOSOPHY

## 志存高远 创新未来

Our motto are keeping faith, hardworking,  
be innovative, detail-oriented, swift.

To be a man simply and to do things seriously  
简单做人 · 认真做事

# OSR MEDICAL

## C企业简介 COMPANY INTRODUCTION

张家港欧思瑞科技有限公司是集设计、制造、销售、服务于一体的高科技术公司，是蒸汽灭菌设备专业制造商。公司位于美丽的长江之滨江苏省张家港市。公司拥有一批业务精湛的工程师、精干的营销团队、完善而专业的售后服务队伍。公司拥有强大的技术力量和最先进的生产设备，并具有一流的应用工艺和完备齐全的检测、化验仪器来确保产品的质量。欧思瑞人通过自身不懈的努力，公司事业领域迅速扩展，在医药、食品、化工、造纸、印染等行业的应用中获得巨大成功。

Zhangjiagang Ostrui Medical Technology Co., Ltd. is an integrated high-tech enterprise which includes the design, research and development, manufacturing, sales, trade and service. Main productions are sterilizers. The factory lies in Zhangjiagang city by side of Yangtze River, near to Shanghai. We own a group of excellent engineers which provide strong technology support, efficient businessmen, complete and professional after sale service team. We use advanced manufacture & inspection equipments and application technique. Above mentioned ensure productions quality steadily and effectively. After years of efforts, we have got certain influence which we deserved in these fields, such as medicine, food, chemical industry, paper making, printing and dyeing and so on.

## B Bowie-Dick测试

■ 使用前

■ 正常

■ 异常

Bowie-Dick 测试程序是用于测试高压真空型灭菌设备对通气性物体进行灭菌处理效果的试验方法。美国医疗器械协会 (AAMI) 也将其作用确认灭菌装置运行情况的标准方法。该试验卡将 BD 测试包放置在灭菌装置内的规定位置，进行 134°C/3.5 分的灭菌循环后，取出测试包后观察测试卡上颜色的变化判断灭菌设备的性能。当发生真空泵故障、灭菌循环、控制不完全、灭菌室漏气等情况时，测试卡的变色不均匀，从而可以简单地发现灭菌设备的异常。

Bowie-dick test is a kind of test way to confirm that whether the operation of the autoclave steam sterilizing equipment is normal and whether it can sterilize completely.

Bowie-Dick Test Program is developed by J.H.Bowie and J.Dick from micrbion college of Edinburge Royal Hospital UK which is used for testing the sterilizing effects of ventilated articles which is sterilized by the high pressure vacuum sterilizing equipment .AAMI also used it as the standard method to confirm the running about sterilizer. At first, using the towel to pack the test cards as a test parcel and put it to the specified place in the chamber. After the sterilizing circle of 134°C/3.5min,take the parcel out and judge the performance of the sterilizing equipment through the color of the test card. If the vacuum pump broken, sterilizing circle, control incompletely, sterilizing chamber leak, the color of the testing card will not be equal. Then we can recognize the abnormality of the sterilizing equipment easily.

## P 保压测试程序

Pressure Maintaining Test Procedure

测试用于验证在真空状态下，漏入灭菌室的气体量不足以阻碍蒸汽渗透负载并且不会导致在干燥期间，负载受到再次污染压力上升的速度不应超过 0.13kpa/min。

The test is used under the condition of vacuum to test that the air which is leaked into the inner chamber will not be enough to hinder the load about steam permeating. To test during the drying period the load will not be polluted again and the speed of pressure rising will not exceed 0.13kpa/min.

### 现场验证 Site confirmation

## C部分优质配件 COMPONENTS

为保证每一台欧思瑞灭菌设备安全可靠、运行稳定、低耗高效，我们精心选用下列世界知名品牌配件，使产品具备国际品质。

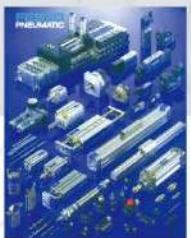

To make sure every OSR sterilizer safety and reliability, stable running, low investment and high profit, we carefully select the following components that are world-famous, which can make OSR possess international quality.

YOKOGAWA

spirax  
sarco

FESTO

PALL

SIEMENS

JUMO

## P 生产设备 PRODUCTION EQUIPMENTS

### A. 自动管焊机

德国全进口自动管焊机，一次焊接双面成形，内部焊接处圆滑过渡，不存在滞留死角或没焊透的现象，符合欧洲 GMP 和美国 FDA 标准。

Automatic welding machine

Germany imported automatic welding machine, a welding double-side molding, internal weld smooth transition, there is no stranded dead or no incomplete penetration phenomenon, in line with the European GMP and American FDA standard.

### B. 锯管机

德国全进口锯管机，与自动管焊机配套使用，焊接效果更佳。

Pipe cutting machine

Germany imported pipe cutting machine, with automatic welding machine, better welding effect.

### C. 自动弯管机

确保管路转弯更平滑，无死角。

Automatic bending machine

To ensure that the pipeline is turning more smooth, no dead angle.

### D. 摆臂钻床

用于各种型材、棒材、管材的打孔，打孔精度高。

Radial drilling machine

Suitable for pinching various profiles, bars, pipes, punch precision.

### E. 自动焊机

保证产品主要受压元件的焊接质量，焊接成型好。

Automatic arc welding machine

To ensure the welding quality of main pressure components, better welding molding.

### F. 激光切割机

用于各种型材、棒材、管材的切割，避免由于高温对材料特性的改变。

Sawing machine

Suitable for cutting various profiles, bars, pipes, cutting by saponification liquid cooling, avoid because of high temperature on material properties change.

### G. 半自动等离子切割机

8mm 以上不锈钢板材均采用等离子切割后经金加工而成，保证了金加部件的精度。

Semi-automatic plasma cutting machine

8mm stainless steel plate by plasma cutting after gold processing, ensure the machining parts precision.

### H. 数控折弯机、剪板机

保证钣金件的加工精度。

CNC bending machine, shearing machine

Ensure the machining precision sheet metal parts.

# OSR MEDICAL

## C质量控制 QUALITY CONTROL

采购控制：严格筛选供应商，质检部在物品进行进库前进行抽检，杜绝不合格原材料、配件入库；  
过程控制：生产流程各个质量控制点严格按设计。工艺要求把关，决不允许不合格半成品流入下一道工序；  
出厂控制：整机运行调试严格按出厂标准进行，绝不允许存在缺陷的产品出厂。

### Purchasing control:

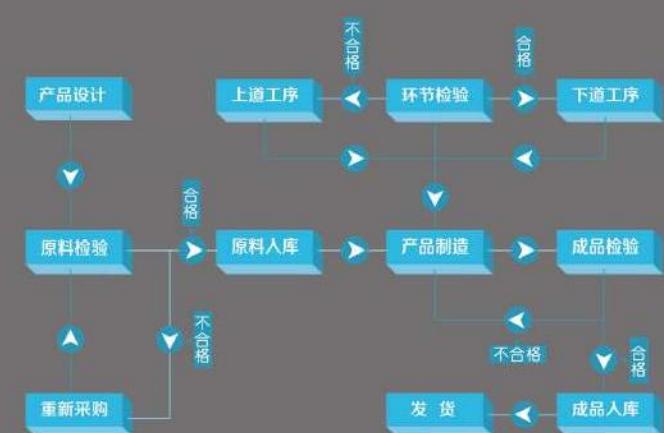

Strictly select suppliers. QC will detect the raw and processed materials before taking them to the storage.

### Manufacturing control:

strictly control the quality according to the design and industry requirements during the all course.

### Delivery control:

Debugging the products before the product leaves the factory. The products without defects will be allowed to leave the company.

**OSA MEDICAL**

## 检验设备 INSPECTION EQUIPMENTS

**超声波测厚仪:** Ultrasonic wave thickness meter  
板材和管材厚度的检测。To inspect thickness of pipe and plate.

**粗糙度仪:** Roughmeter  
内胆抛光后光洁度的检测和管道光洁度的检测。  
To inspect smoothness of inner chamber and pipeline.

**噪音计:** Noise meter  
整机运行的噪音，特别是真空泵运行时的噪音检测。  
To inspect noise when the equipment is running,  
especially for vacuum pump.

**测温仪:** Thermo detector  
保温层外壁温度的检测。  
To inspect temperature of outer wall.

**管道内窥镜检测仪:** Endoscope detector used for pipes  
卫生级管路的焊接质量检测。  
To inspect welding situation of sanitary grade pipeline.

**光谱分析仪:** Spectrum analyzer  
检测每批材料的材质。  
To inspect material quality of raw material.

**OSR MEDICAL**

# MD 脉动真空灭菌柜

## Pulsation Vacuum Sterilizer

机动门系列脉动真空灭菌柜是我公司根据国家 GMP 规范对灭菌设备的要求而设计、生产的。该系列产品广泛应用于生物工程、医疗卫生、实验生物、制药等行业，主要用于生物制品、器皿、无菌衣、医疗器械、医用敷料等物品的灭菌处理。

This series of pulsation vacuum sterilizers is designed and manufactured by our company according to national GMP specification of sterilization equipments, conforming to GMP requirements. It is broadly applied into the field of bioengineering, health and sanitary, laboratory biology and pharmaceutical industry etc. It mainly used for the sterilization of articles, such as biological products, utensils, sterile gowns, medical appliances and medical dressings etc.

蒸汽压力 Steam pressure: 0.3~0.5Mpa	设计压力 Design pressure: 0.3Mpa
水源压力 Water pressure: 0.15~0.3Mpa	工作压力 Working pressure: 0.25Mpa
压缩空气压力 Compressed air pressure: 0.5~0.7Mpa	工作温度 Working temperature: 139°C

### 结构/性能/特点 Structure and features

- 主体由内外二层组成，内胆为优质304不锈钢，自动焊接一次成形；夹套采用Q345R优质压力容器专用钢板。全不锈钢拉丝板装饰外罩。具有标准GMP验证接口，方便用户随时进行设备验证。
- 密封门采用电动升降，操作简单，安全可靠。密封条采用优质硅橡胶制成，耐高温，使用寿命长。
- 控制系统采用PLC、触摸屏加微型打印机配置。控制系统稳定，控制精确。
- 具有完善的数据记录、打印、保存功能，打印温度、时间、压力曲线图。
- 配置双通道纪录仪。
- 管路系统采用德国GEMU气动阀和纳西坦真空泵等最优化配置。
- The main body is composed of inner layer and outer layer. The inner chamber is made of high quality acid-proof 304 stainless steel. Automatic welding, once forming. The Jacket is made of Q345R material special for pressure vessel. Stainless steel wiring-drawing plate for decoration case. There is GMP confirmation access for the users to confirm the equipment.
- It adopts motor-driven sealing door. Operation easily and safely. The sealing strips adopt excellent heat-resistant silicon rubber with long service life.
- The control system adopts touch screen, PLC, mini-printer to ensure running steadily and inspecting temperature correctly.
- Complete functions of date record, printing and storing. Temperature, time and pressure graph may be printed.
- Two ways recorders.
- Pipeline system adopts the most excellent accessories in the trade, such as GEMU air-operated valve from Germany and NASH vacuum pump and so on.

# MD-PIII 实验室用灭菌柜

## Laboratory Sterilizer

该系列灭菌柜是我公司为解决灭菌初期带毒排放的水和空气进行集中后灭菌处理而进行设计、研发、生产的，该系列灭菌柜主要用于生物实验室，对易产生环境危害的废液和空气进行二次处理，最终达到无菌排放。

This series of laboratory sterilizers is designed and manufactured by our company in order to solve centralized sterilization of water and air with toxic emissions at the beginning of sterilization. This series sterilizer is mainly used in biology laboratory, to do two times treatment of waste water and air which has easily environment hazard, finally reach the sterile emission.

蒸汽压力 Steam pressure: 0.3~0.5Mpa

设计压力 Design pressure: 0.3Mpa

水源压力 Water pressure: 0.15~0.3Mpa

工作压力 Working pressure: 0.25Mpa

压缩空气压力 Compressed air pressure: 0.5~0.7Mpa

工作温度 Working temperature: 139°C

### 结构/性能/特点 Structure and features

● 内胆为优质304或316L不锈钢，夹套采用Q345R压力容器专用钢板或304材质。全不锈钢拉丝装饰外罩。具有标准GMP验证接口，方便用户随时进行设备验证。

● 密封门采用电动升降，操作简单，安全可靠。密封条采用优质硅橡胶制成，耐高温，使用寿命长。

● 控制系统采用PLC、触摸屏加微型打印机配置。控制系统稳定，控制精确。

● 具有完善的数据记录、打印、保存功能，打印温度、时间、压力曲线图。

● 配管双通道记录仪。

● 内室镜面抛光。

● 有严格的管理操作权限。分为管理人员、工艺人员、操作人员。

● The inner chamber is made of 304 or 316L stainless steel. The jacket is made of Q345R material special for pressure vessel. Stainless steel wiring-drawing plate for decoration case. There is GMP confirmation access for the users to confirm the equipment.

● It adopts motor-driven sealing door. Operation easily and safely. The sealing strips adopt excellent heat-resistant silicon rubber with long service life.

● The control system adopts touch screen, PLC, mini-printer to ensure running steadily and inspecting temperature correctly.

● Complete functions of recording, printing and storing. Temperature, time and pressure graph can be printed.

● Two ways recorders.

● Inner chamber mirror polishing.

● Strictly operational permission set for administrative staff and technologist and operators.

# DW 动物灭菌柜

## Animal Carcass Sterilizer

该系列灭菌柜是我公司为解决在处理动物尸体灭菌过程中易产生油污的问题进行设计、研发、生产的，该系列灭菌柜主要用于动物尸体的灭菌处理，有效的解决了油污对排放管道的污染和堵塞问题，并具有灭菌柜内清洗功能。

This series of animal carcass sterilizers is designed and manufactured by our company in order to solve the problems of easily produce oil pollution at the sterilization process. This series sterilizer is mainly used in sterilization of animal carcass, it can effectively solve the problem of pollution and blockage of the discharge pipe, and has the function of cleaning.

蒸汽压力 Steam pressure: 0.3~0.5Mpa

# WSQ 卫生级灭菌柜

## Sanitary Grade Pure Steam Sterilizer

本系列设备严格按欧盟 GMP, FDA 相关标准进行设计和制造, 主要对百级洁净区域的无菌衣, 灌装容器具以及其它一些要求无热源的物品进行湿热灭菌。

This series is strictly designed and manufactured conforming to EU, GMP and FDA standards. It is used for treatment of biological products, utensils, sterile gown, medical appliance, medical dressing and other articles without heat source in hundred-grade clean range on the basis of moist heat sterilization.

蒸汽压力 Steam pressure: 0.3~0.5Mpa

设计压力 Design pressure: 0.3Mpa

水源压力 Water pressure: 0.15~0.3Mpa

工作压力 Working pressure: 0.25Mpa

压缩空气压力 Compressed air pressure: 0.5~0.7Mpa

工作温度 Working temperature: 139°C

### 结构/性能/特点 Structure and features

- 主体采用卧式矩形结构, 内胆为优质卫生级316L不锈钢, 夹套采用304材质, 完全符合GMP和FDA相关标准。全不锈钢拉丝装饰外罩。具有标准GMP验证接口, 方便用户随时进行设备验证。
- 双路进汽, 内层进纯蒸汽, 管路和阀门为316L材质; 夹层进工业蒸汽, 304不锈钢管路。
- 控制系统采用PLC、触摸屏、微型打印机。控制系统稳定, 控制精确。
- 具有完善的数据记录、打印、保存功能, 可打印温度、时间、压力曲线图。
- 配置双通道纪录仪, 与打印机同时实时监测灭菌柜内的温度和压力。
- 空气过滤器可在线灭菌, 预留完整性测试接口。
- 生产过程及程序控制具有较高的可追溯性。
- 设备上采用的配置均符合GMP和FDA相关标准。
- 设备的整个制造过程均有纪录可追溯。
- 内室圆弧大于40°
- 内室表面抛光处理, 粗糙度Ra≤0.4um
- 有严格的操作管理权限, 实行三级密码控制, 分别为操作人员、工艺人员和管理人员。

The main body adopts horizontal rectangle structure. The inner chamber is made of sanitary grade 316L stainless steel, the jacket is made of 304 material. Conforming to GMP and FDA standards totally. Stainless steel wiring-drawing plate for decoration case. There is a standard GMP certification joint for the users to certificate the equipment at any time.

Steam enters the sterilizer via two pipelines, the inner chamber is fed with pure steam, whose pipelines, valves and instruments are made of 316L material. The jacket is fed with industrial steam, whose pipelines are made of 304 stainless steel.

The control system adopts touch screen, PLC, mini-printer to ensure running steadily and inspecting temperature correctly.

Complete functions of date record, printing and storing. Temperature, time and pressure graph may be printed.

Equipping multichannel recorders, to record temperature and pressure of inner with mini-printer together at the same time.

# CK 口服液、针剂检漏灭菌柜

## Leakage Detection Sterilizer of Oral Liquid and Injection Solution

本系列设备主要用于安瓿、西林瓶针剂和口服液的灭菌、检漏、清洗。分为真空和色水两种检漏方式，保证废品检出率为100%，最后用纯化水清洗灭菌物品，保证灭菌物品表面的洁净。

The series is mainly used for sterilization, leakage detection and cleaning of such preparations as ampoule, oral liquid and injection solution in penicillin bottle. The device conducts leakage detection with vacuum or vacuum plus colorless water, ensuring 100% detection rate of wastes. At last, it uses clean water to clean sterilized products, ensuring no pollution in outer wall of the bottle.

蒸汽压力 Steam pressure: 0.3~0.5Mpa

设计压力 Design pressure: 0.17~0.3Mpa

水源压力 Water pressure: 0.2~0.4Mpa

工作压力 Working pressure: 0.15~0.27Mpa

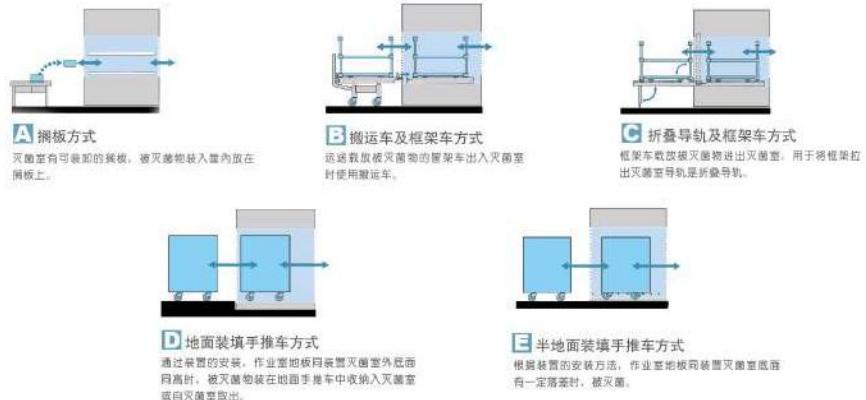

压缩空气压力 Compressed air pressure: 0.5~0.7Mpa

工作温度 Working temperature: 134°C

### 结构/性能/特点 Structure and features

- 主体采用卧式矩形结构，内胆为优质304不锈钢，全不锈钢拉丝装饰外罩。
- 具有标准GMP验证接口，方便用户随时进行设备验证。
- 密封门采用电动升降结构，操作简单。门密封条采用优质硅胶制成，密封性能好，耐高温，使用寿命长。
- 采用广角、雾状喷淋，确保柜内无死角，提高温度的均匀性。
- 采用德国GEMU气动阀，威乐水泵等最优化配置。
- The main body adopts horizontal rectangle structure. The inner chamber is made of 304 stainless steel. Stainless steel wiring-drawing plate for decoration case.
- There is GMP confirmation access for the users to confirm the equipment at any time.
- It adopts motor-driven sealing door which is operated simply and safely. The sealing strips adopt excellent heat-resistant silicon rubber with long service life.
- It sprays mist by wide-angle. To ensure no dead angle in cabinet and raise uniformity of temperature.
- It uses the most excellent accessories in trade, such as GEMU air-operated valve and WILO water pump.

# KL 快速冷却灭菌柜

## Rapid Cooling Sterilizer

快速冷却灭菌柜具有预真空、高温快速灭菌及灭菌后快速冷却等先进功能，加上独特的反压保护措施，能对各种耐温热的散装、瓶装、罐装和软包装物品进行可靠的灭菌操作。

This series takes advanced functions of pre-vacuum, quick sterilization with high temperature, quick cooling after sterilization, and unique anti-pressure protection device. It may reliably sterilize all kinds of damp-heat resisting products in bulk, bottle, can and soft package.

蒸汽压力 Steam pressure: 0.3~0.5Mpa	设计压力 Design pressure: 0.17~0.3Mpa
水源压力 Water pressure: 0.2~0.4Mpa	工作压力 Working pressure: 0.15~0.27Mpa
压缩空气压力 Compressed air pressure: 0.5~0.7Mpa	工作温度 Working temperature: 134°C

### 结构/性能/特点 Structure and features

- 严格按《钢制压力容器》设计制造验收的箱体。
- 独特的耐高温硅橡胶燕尾型嵌入式设计，确保门的密保性。
- 主控制系统微电脑PLC+触摸屏+DCS远程后台监控系统。
- 保温材料采用硅酸铝，保温外层采用不锈钢拉丝板。
- 设备附有标准的GMP验证接口。
- 效果极佳的快速冷却装置。

- The box is designed, produced and tested strictly according to "Steel pressure vessel".
- The unique design of embedded dove-tail shape with heat-resisting silicone rubber ensures the seal tightness of the door.
- The main control system adopts micro-computer PLC and touch screen and DCS long distance firing-room monitoring system.
- Insulation adopts aluminum silicate materials. Elegant stainless steel decorates cover.
- Standard GMP certification joint.
- Excellent rapid cooling device.

# CKS水浴式口服液、针剂检漏灭菌柜

## Water-bath Type Leakage Detection Sterilizer of Oral Liquid and Injection Solution

该系列水浴式检漏灭菌柜利用高温循环水作为灭菌介质，主要用于安瓿、西林瓶等针剂、口服液产品进行水淋式灭菌操作和检漏清洗处理。用纯化水通过水泵循环、板式换热器加热，对物品进行水淋式灭菌操作。该设备温度均匀性好，温度调控范围宽（80-126℃），同时避免了工作过程中的二次污染。真空与色水相结合的检漏方式，保证了100%的废品检出率。

Water-bath type ampoule leakage detection sterilizer uses high temperature circulating water as sterilization medium. It is mainly used in water-bathing type sterilizing operation and leakage detection washing treatment of injection, oral liquid and other products. After pure water circulated by water pump and heated by plate heat exchanger, it performs sterilizing program in the manner of spraying. This equipment takes advantages of good temperature evenness, wide temperature adjustment range (80-126°C). At the same time, it avoids the second pollution in the work process. The injection of combining vacuum with colorful water ensures the complete inspection result.

蒸汽压力Steam pressure:0.4~0.6Mpa	设计压力Design pressure:0.3Mpa
水源压力Water pressure:0.2~0.4Mpa	工作压力Working pressure:0.25Mpa
压缩空气压力Compressed air pressure:0.5~0.7Mpa	工作温度Working temperature:139°C

### 结构/性能/特点 Structure and features

- 卧式矩形结构，优质耐酸不锈钢304内胆，全不锈钢拉丝板外罩。设备具有标准GMP验证接口，方便用户随时进行设备验证。
- 密封门可选平移门、电动门。
- 可选计算机控制或PLC+触摸屏系统。F0值与温度、压力曲线双重保证灭菌效果，也可采用单个参数控制。该系统测温精确，运行稳定，并具有完善的灭菌档案记录。
- 管路系统主要部件有AlfaLaval不锈钢板式换热器、Grundfos循环水泵、Burkert防水锤阀及高温气动阀、NASH真空泵、Spraying喷淋系统等。
- 产品的设计压力、工作压力是依据被灭菌物品的特性来进行选择的。
- The main body adopts horizontal rectangle structure. High quality acid-proof stainless steel 304 inner liner, stainless steel wiring-drawing plate for decoration case. It has standard GMP Certification joint for user to certificate the equipment freely.
- It adopts double-door-leaf auto-moving door or mechanical door
- It adopts computer-control or PLC+ touching screen system. F0 value ensures the sterilizing results together with the curve of temperature and pressure. The system inspects temperature correctly and runs steadily, keeping complete sterilizing record.
- It adopts the excellent system in the trade. The main components contain AlfaLaval stainless steel baffle heat exchanger, Grundfos cycle water pump, Burkert water-resistance valve and high temperature air-operated valve, NASH vacuum pump and spraying system and so on.
- The pressure of design and running is selected according to characters of articles sterilized.

# DKS 水浴式大输液灭菌柜

## Water-bath Type Infusion Bottle Sterilizer

该系列水浴式灭菌柜严格按照 GMP 标准设计制作，利用高温循环水作为灭菌介质，对物品进行水淋式升温、灭菌、冷却操作。整个工作过程中，灭菌介质运行于封闭的循环系统，有效防止了二次污染。该设备具有热效高、温度调控范围宽、温度均匀性好等一系列优点。辅以反压和对压保护措施，广泛用于制药行业对玻璃瓶、塑料瓶装、软袋等大输液产品的灭菌操作。

This series adopts high temperature circulating water as sterilization medium, and carry out water-pouring sterilizing operation for articles via warming up, sterilizing and cooling. The equipment takes advantages of good temperature evenness, wide temperature adjustment range. The sterilization medium works in a relatively closed circulation system, to avoid the secondary pollution in the work process. It is widely used for sterilization of infusion products, such as glass bottles, plastic bottles, soft bags and so on.

蒸汽压力 Steam pressure: 0.4~0.6Mpa	设计压力 Design pressure: 0.17~0.30Mpa
水压 Water pressure: 0.2~0.4Mpa	工作压力 Working pressure: 0.15~0.27Mpa
压缩空气压力 Compressed air pressure: 0.5~0.7Mpa	工作温度 Working temperature: 125°C

### 结构/性能/特点 Structure and features

- 主体采用卧式圆形结构，受力均匀。优质耐酸不锈钢304内胆、机械镜面抛光，美观、耐腐蚀。设备具有标准GMP验证接口，方便用户随时进行设备验证。
  - 自动进行出柜装置，减轻工人劳动强度。
  - 密封门为平移门，操作简单。
  - 采用计算机进行全过程监控，各种参数实时记录及打印输出，极大地提高了整机的可靠性和智能化。可准确地运用PID温控技术，实时精确地监控压力情况。
  - 产品的设计压力，工作压力是依据灭菌物品的特性来进行选择的。
- The main body of horizontal round cylinder structure, high-quality acid-proof stainless steel 304 inner chamber. Machinery mirror polishing. Standard GMP certification joint for user to certificate the equipments freely.
- The devices of getting in and out automatically. Operation simply and low labor intensity.
- It adopts sliding door, operation simply.
- Inspecting entire process by computer, kinds of parameters may be printed at any time. PID temperature control technology can be used for monitoring the pressure situation.
- Design and working pressure is selected according to characters of sterilized articles.

# TF 通风式灭菌柜

## Air and Steam Mixture Sterilizer

通风式灭菌柜采用空气和蒸汽的混合气体作为灭菌介质进行灭菌，通过风机将空气和蒸汽充分混合，并在灭菌柜内按特定路线进行循环。在有效提供良好的热传递的同时，确保了温度的均匀性，并且干燥效果更好。工作时通过控制压力和温度的相互关系，避免灭菌产品发生起泡、变形、爆塞等现象。

Air and steam mixture sterilizer adopts air and steam mixed as sterilizing medium to do sterilization, air and steam are fully mixed through fan, and circulate in a sterilizer according to a specific route. At the same time, good heat transfer is provided to ensure the uniformity of temperature, and the drying effect is better. By controlling the relationship between pressure and temperature, the phenomenon of sterilizing products such as foaming, deforming and plugs are avoided.

蒸汽压力 Steam pressure: 0.3~0.5Mpa	设计压力 Design pressure: 0.3Mpa
水源压力 Water pressure: 0.15~0.3Mpa	工作压力 Working pressure: 0.25Mpa
压缩空气压力 Compressed air pressure: 0.5~0.7Mpa	工作温度 Working temperature: 139°C

### 结构/性能/特点 Structure and features

- 主体由内胆和夹套二层组成，均为优质304不锈钢。全不锈钢拉丝板外罩。
- 密封门采用电动升降或平移门两种形式，操作简单、安全可靠。密封条采用优质硅橡胶材质，耐高温，使用寿命长。
- 具有标准GMP验证接口，方便用户随时进行设备验证。
- 控制系统采用PLC、平板电脑配置，控制系统稳定，控制精确。
- 具有完善的数据记录、打印、保存功能，打印温度、时间、压力曲线图。
- 配管双通道纪录仪。
- 管路系统采用德国GEMU气动阀和纳西姆真空泵等最优化配置。
- 机械密封采用德国品牌，确保运行稳定、安全。

- The main body is composed of inner layer and outer layer. The inner chamber is made of high quality acid-proof 304 stainless steel. Automatic welding.
- It adopts motor-driven sealing door. Operation easily and safely. The sealing strips adopt excellent heat-resistant silicon rubber with long service life.
- The control system adopts computer panel, PLC to ensure running steadily and inspecting temperature correctly.
- Complete functions of date record, printing and storing. Temperature, time and pressure graph may be printed.
- Two ways recorders.
- Pipeline system adopts the most excellent accessories in the trade, such as GEMU air-operated valve from Germany and NASH vacuum pump and so on.
- Mechanical seal adopts the German brand to ensure the operation is stable and safe.

# ZYF 中药灭菌柜

## Chinese Traditional Medicine Sterilizer

该系列设备适用于对中药、谷类、茶叶香辛料及其他粉末的灭菌。先利用夹套预热，然后利用饱和蒸汽作为灭菌介质进行灭菌，最后再用夹套加热，内室真空进行干燥。该设备有独特的进汽方式，减少冷凝水，可有效解决中药粉结块现象。

This series is used to sterilize Chinese traditional medicine, corniness, tea, spice and other things like powder. During the whole working process, the jacket is first used to pre-heat the device, saturated steam is applied as sterilization medium for sterilization, followed by pre-heating again via the jacket, and finally inner chamber is dried with vacuum. It adopts special gas admission style to reduce condensate water. And it prevents Chinese traditional medicine from lumping.

蒸汽压力 Steam pressure: 0.3~0.5Mpa

设计压力 Design pressure: 0.3Mpa

水源压力 Water pressure: 0.15~0.3Mpa

工作压力 Working pressure: 0.25Mpa

压缩空气压力 Compressed air pressure: 0.5~0.7Mpa

工作温度 Working temperature: 139°C

### 结构/性能/特点 Structure and features

- 主体由内外二层组成，内胆为优质304不锈钢，夹套采用Q345R优质压力容器专用钢板，自动焊接一次成形。全不锈钢拉丝可板装饰外罩。具有标准GMP验证接口，方便用户随时进行设备验证。
- 密封门采用电动升降，操作简单，安全可靠。密封条采用优质硅橡胶制成，耐高温，使用寿命长。
- 保温采用硅酸铝棉，保温性能好。
- 独特的冷凝水控制技术。

● The main body is composed of inner layer and outer layer. The inner chamber is made of high quality acid-proof 304 stainless steel. Automatic welding, once forming. The jacket is made of Q345R material special for pressure vessel. Stainless steel wiring-drawing plate for decoration case. There is GMP confirmation access for the users to confirm the equipment.

- It adopts motor-driven sealing door. Operation easily and safely. The sealing strips adopt excellent heat-resistant silicon rubber with long service life.
- It uses aluminum silicate cotton to moisturize, taking advantages of good heat-insulating property
- Unique condensate water control skill

# XZ 旋转式灭菌柜 Rotary Sterilizer

## 结构/性能/特点 Structure and features

- 严格按《钢制压力容器》设计制造验收的箱体。
- 操作简单、灵活轻捷的电动平衡门。
- 独特的耐高温硅橡胶燕尾型嵌入式设计，确保门的密封性。
- 主控制系统微电脑PLC+触摸屏+DCS远程后台监控系统。
- 精美的不锈钢装饰外罩。
- 设备附有标准的GMP验证接口。
- 灭菌滚笼无级变频调速。
- The box is designed, produced and tested strictly according to <Steel Pressure Vessel>.
- Electrically balance door, flexible and easy to operate.
- The unique design of embedded dove-tail shape with heat - resisting silicone rubber ensures the seal tightness of the door.
- The main control system adopts micro-computer PLC and touch screen and DCS long distance tiring - room monitoring system.
- Stainless steel wiring-drawing plate for decoration case.
- Standard GMP certification joint.
- Stepless variable - frequency speed control.
- Design and working pressure is selected according to character of sterilized articles.

目前，随着制药、食品等行业的的发展，需要旋转式灭菌柜的用户越来越多。这种形式的灭菌仍然是建立在常规的灭菌原理上（饱和蒸汽灭菌），但装载灭菌物品的灭菌车是以一个可调整的速度不断地正反旋转的，这个动力通过一个磁力驱动装置来完成。

At present, with development of such industries as pharmacy and food, more and more users need rotary sterilizers .This kind of sterilization is still based on general sterilization principle (sterilization with saturated steam), but sterilization vehicle continues backward and forward rotation at an adjustable speed via magnetic drive unit inside of equipment .The power of rotation is from unique driving device invented by our company.

## Automatic solution preparation systems

### 应用领域 Application area

#### 生物制药

(单抗、胰岛素、白蛋白、疫苗、血制品等)

#### bio-pharmaceuticals

(monoclonal antibodies, insulin, albumin, vaccines, blood products, etc.)

培养基及缓冲液配制系统

medium and buffer solution preparation system

生物反应器、发酵系统

bioreactor and fermentation system

生物工程下游系统

downstream system of bioengineering

#### 制药 (制剂、原料药等)

#### pharmaceutical (biologics, API, etc)

无菌配液系统 aseptic dispensing system

洁净管道系统 clean pipeline system

CIP工作站 CIP Workstation

卫生级设备 sanitary grade equipment

#### 其他行业 Other industries

非标工艺模块工程 non standard process module engineering

卫生级管道工程 sanitary grade pipeline engineering

特种材料设备管道工程 special material equipment pipeline engineering

欧思瑞致力于制药工艺系统的研发和服务，为制药企业提供先进的解决方案，提供制药行业所需的制药流体工艺系统，如制药用水系统、药液配置系统、CIP/SIP 系统等。我们熟悉国内外最先进的设计理念及技术，并结合公司多年的建造经验，提供客户最专业的工程设计。

Ousirul dedicated to the pharmaceutical process system development and services, to provide advanced solutions for pharmaceutical companies, to provide pharmaceutical fluid process system for pharmaceutical industry, such as pharmaceutical water system, medicine liquid configuration system and CIP/SIP system. We are familiar with the most advanced design concepts and technologies domestic and foreign, and provide the most professional engineering design with the company's years of construction experience.

- 如需到用户现场排除设备故障，我们承诺国内、二线城市在24小时内到达，偏远地区最迟在72小时内到达客户现场。
- 如设备出现确实需要我公司售后服务人员到现场处理的故障，我们会按承诺时限到达现场进行排除，然后与客户一起分析引起故障的原因。如由于是用户使用不当而造成的设备故障，我们在收取交通费、人工费和材料成本费之外，不再另行收取其他费用。

● Visiting domestic customer spot and get feedback.

● If the domestic customer does need us to go to the site to exclude equipment failure, we promise that we will arrive within 24hours, if the site lies on the first-line cities or second-tier cities, otherwise we will arrive within 72hours if the site lies on the remote areas.

● If the domestic customer does need us to go to the site to exclude the equipment failures, firstly we will arrive within the agreed time and solve the problems, secondly we will analyze the fault causes together with the customer if the equipment failures was caused by improper use of user, the expense of transport and labor and material will be bore by the customers according to cost.
